Philippine Reference Paper on Regulatory Principles in Telecommunications Services

The commitments in telecommunication services are in accordance with the General Agreement on Trade in Services and its Annex on Telecommunications. In support of market access commitments undertaken, the following principles will form the basis for the regulatory framework in basic telecommunications.

1. Competitive safeguard

Appropriate measures shall be maintained for the purpose of preventing suppliers from engaging in or continuing anti-competitive practices.

2. Interconnection

In order to achieve viable, efficient, reliable and universal telecommunications services, a fair and reasonable interconnection of facilities of authorised public network operators and other providers of telecommunications services shall be provided.

Interconnection shall be at any technically feasible point in the network, under non-discriminatory terms and conditions, in a timely fashion, and on terms and conditions that are fair, transparent and reasonable.

A service supplier requesting interconnection with another supplier will have recourse after a reasonable period of time which has been made publicly known to an independent domestic body, which may be a regulatory body referred to in paragraph 5 below, to resolve disputes regarding appropriate terms, conditions and rates for interconnection within a reasonable period of time, to the extent that these have not been established previously.

3. Universal Service

Universal service obligations, as may be defined by the appropriate Authority, shall be administered in a transparent, non-discriminatory and competitively neutral manner.

Authorised international gateway and mobile cellular telephone service providers are required by law to install a set number of local exchange lines in designated areas.

4. Public availability of licensing criteria

Where a license is required, the following shall be made publicly available:

- (a) all the licensing criteria and the period of time normally required to reach a decision concerning an application for a license;
- (b) the terms and conditions of individual licenses

The reasons for the denial of a license will be made known to the applicant upon request.

5. Independent regulators

The regulatory body is separate from, and not accountable to, any supplier of basic telecommunications services. The decisions of and the procedures used by regulators shall be impartial with respect to all market participants.

The regulation of telecommunication suppliers shall rely principally on an administrative process that is stable, transparent and fair, giving due emphasis to technical, legal, economic and financial considerations, and with due regard to the observance of due process at all times.

A national consultative forum shall be maintained to allow interaction among the telecommunications industries, user groups, and academic and research institutions on important issues in the field of communications.

6. Allocation and use of scarce resources

Any procedures for the allocation and use of scarce resources, which are frequencies, numbers and rights of way, will be carried out in an objective, timely, transparent and non-discriminatory manner. The current state of allocated frequency bands will be made publicly available, but detailed identification of frequencies allocated for specific government uses is not required.

(4) None	

Notes to the Specific Commitments in the Sectors of Transport Services:

Maritime Transport Services

1. <<Maritime Agency Services>> means activities consisting in representing, within a given geographic area, as an agent the business interests of one or more shipping lines or shipping companies, for the following purposes:
 - (a) marketing and sales of maritime transport and related services, from quotation to invoicing, and issuance of bills of lading on behalf of the companies, acquisition and resale of the necessary related services, preparation of documentation, and provision of business information;
 - (b) acting on behalf of the companies organising the call of the ship or taking over cargoes when required.
2. <<Pushing and towing services>> on the high seas and on coastal waters shall mean the business of pulling a vessel with the help of a watercraft/vessel, which is equipped with powerful engines and deck mounted winches to perform towing and pushing services. This is a service provided to ships, which are difficult to maneuver to berth or during bad weather conditions to assure their safety. These services are generally provided by vessels, which do not themselves carry freight or passengers.
3. <<Maritime cargo handling services>> means activities exercised by stevedore companies, including terminal operators, but not including the direct activities of dockers, when this workforce is organised independently of the stevedoring or terminal operator companies. The activities covered include the organisation and supervision of:
 - the loading/discharging of cargo to/from ship;
 - the lashing/unlashing of cargo;
 - the reception/delivery and safekeeping of cargoes before shipment or after discharge
4. <<Port and waterway operation services>> shall mean the operation services of Ferry Terminals under the Road Roll-On/Roll-Off Terminal System (RRTS) of the Philippines' Strong Republic Nautical Highway (SRNH). The Guidelines on the Development, Construction, Management and Operation of Ferry Terminals under the Road Roll-on Roll-Off Terminal System (RRTS) is contained in Philippine Ports Authority (PPA) Administrative Order No. 03-2004.

Freight Forwarding Services

1. Notwithstanding the fact that road, rail, inland waterways and related auxiliary services are not fully covered in this schedule of specific commitments, a multimodal transport operator shall have the ability to rent or lease trucks, railway carriages or barges, and related equipment, for the purposes of inland forwarding of cargoes, or have access to, and use of, these forms of multimodal activities on reasonable and non-discriminatory terms and conditions for the purposes of carrying out multimodal transport operations.

Note1 <<Multimodal transport operator>> means any person who on his own or behalf or through another person acting on his behalf concludes a multimodal transport contract and who acts as a principal, not as an agent or on behalf of the consignor or of the carriers participating in the multimodal transport operations, and who assumes responsibility for the performance of the contract.

Note2 <<Reasonable and non-discriminatory terms and conditions>> means, for the purposes of multimodal transport operations, the ability of the multimodal transport operator to arrange for the conveyance of its merchandise on a timely basis, including priority over other merchandise which has entered the port at a later date.
