Glossary

of Technical Terms

CKD

Completely knocked down- car / bike / automobile which are imported or exported in parts and not as one assembled unit. Such units are first sent to an assembly plant in the target country where all these parts are assembled and one complete car / bike / vehicle is made using the imported components.

CLMV

Cambodia Lao PDR Myanmar Viet Nam - Is an acronym refers to the four newer members of ASEAN namely Cambodia, Lao PDR, Myanmar and Viet Nam. Since Viet Nam is now a developing country, there is a preference to use CLM when referring to the Least Developed Countries of ASEAN. CLM covers Cambodia, Lao PDR and Myanmar.

Cloud Computing

Delivery of on-demand computing resources—everything from applications to data centers—over the Internet on a pay-for-use basis.

Coefficient

A number to reduce tariff. Small coefficient results in steeper cut, while high coefficient results in lesser cut. Current proposal is coefficient of 8 for developed countries and options for developing countries that is 20, 22 and 25.

Competition Policy

The objective of competition policy is to ensure that competition in the market is not restricted in a way that might cause damages to society. The endorsement and implementation of competition policy and regulations that promote competition help improve the efficiency, growth and stability of an economy. The implementation of competition policy and deregulation provides markets with a framework that encourages market discipline, eliminates distortions and promotes economic efficiency.

Consensus

One of the most important operating principles of APEC cooperation that was defined clearly in the Seoul Declaration (1991). It is based on the “commitment to open dialogue and consensus-building, with equal respect for the views of all participants”. Unlike the WTO/GATT, decisions made within APEC are reached by consensus. All meetings, from APEC Economic Leaders’ Meeting to Minister-level Meeting or Official-level Meeting, are informal and undertaken on a voluntary basis. As a result, members are not involved in treaty obligations. All decisions made by Economic Leaders and Ministers are outlined in the Declaration that reflects the common determination of all members.

Consumer Price Index

Measures the average rate of change in prices of a fixed basket of goods and services that represents the expenditure pattern of all households in Malaysia

COO

Certificate of Origin - Means a document issues by the Issuing Authority specifies the details of the origin of the goods or materials.

COPs

Conference of the Parties - is the governing body of international conventions such as Rotterdam, Stockholm and Minamata Convention.

Counterfeit

Unauthorized representation of a registered trademark carried on goods identical or similar to goods for which the trademark is registered, with a view to deceiving the purchaser into believing that he/she is buying the original goods.

MINISTRY OF INTERNATIONAL TRADE AND INDUSTRY

MEDIA RELEASE

SPURRING THE GROWTH OF MALAYSIA AEROSPACE INDUSTRY

1. Malaysia continues to strengthen its position as the Aerospace Hub for South East Asia. The Malaysian aerospace industry has seen significant growth and has provided more than 23,000 jobs opportunities, mainly in aerospace manufacturing and maintenance, repair & overhaul (MRO) with active participation of small and medium-sized enterprises. Total number of companies in operation has reached more than 230. Total revenue recorded in 2017 is RM13.5 billion with aero manufacturing sector contributing 49% and MRO sector contributing 46% of the overall revenue. 2017 was a record year for Malaysia's aerospace exports with RM8.49 billion of exports, an increase of 54% compared with 2016. Malaysia's aerospace exports are mainly in aerospace parts and components.

2. In 2017, thirteen (13) aerospace projects were approved with investments of RM649 million, 80% were domestic investments. The approved projects are expected to generate an additional 1,021 employment opportunities.

3. SMEs involvement in the aerospace industry is also encouraging. The 20 SMEs under the EPP8: Developing SMEs in the Global Aerospace Manufacturing Industry Programme under SME Corp have also shown positive growth and expected to generate more than RM30 million revenue this year. These companies were identified to be further developed as part of the Government's initiative to expand the local aerospace supply chain. The companies are mainly in the parts & components manufacturing (metallic & composites), tooling manufacturing and special processes for aerospace manufacturing.

4. Moving forward in 2018, the industry is expected to grow at 5% with aero manufacturing sector contributing 54% of the overall aerospace industry revenue. Meanwhile, the MRO (Maintenance, Repair & Overhaul) will continue to expand especially in the aero engine and components segment with MRO revenue targeted at RM6.5 billion.

5. The groundbreaking ceremony of Senior Aerospace UPECA sets another important milestone for the aerospace industry development as Senior Aerospace UPECA is the first tenant at the Subang AeroTech Park. Developed by MAHB, the 60-acre site is dedicated for aerospace parts & components manufacturing, engineering services and MRO (Maintenance, Repair & Overhaul).

6. This new 178,000 square feet facility will become Senior Aerospace UPECA's showcase facility in Malaysia. This facility represents an addition to the current facility (136,000 sq. ft.) in Shah Alam. The new investment amounting RM151 million will include state-of-the-art automation manufacturing and comprehensive special process capabilities from the Senior Group. It will also boast double the special treatments capacity and non-destructive capability compared to the current facility. It is expected that 360 highly skilled engineering and technical personnel will be employed for the new facility.

7. NAICO and MITI agencies namely MIDA, MATRADE and SME Corporation Malaysia will continue to facilitate the growth of the aerospace industry by providing a facilitative environment and eco-system. Efforts will also be taken to promote quality investments to Malaysia to accelerate local supply chain development as well as to bring in cutting-edge technology to the country. This is in line with the Malaysia Industry 4.0 initiative to enhance Malaysia's competitiveness at the global arena. The export promotion of aerospace services will remain an important activity to promote Malaysia as the regional aerospace hub in South East Asia.
