# GLOSSARY

Source: <http://www.miti.gov.my/index.php/glossary>

## Domestic Regulations:

Unpacking GATS Article VI.4 on domestic regulation exposes possibly the single most controversial item on the current negotiating agenda, and also one of the greatest threats that GATS poses to democracy. Concern is all the greater because it is not clear whether rules developed in the current negotiations on Article VI.4 will apply to all service sectors or only those where specific commitments have been made. Complex judgement decides the appropriateness of domestic regulations in the services sector, ensuring a balance between public interest and commercial considerations. This judgement must not be allowed to pass from elected governments to WTO disputes panels.

## Duty Drawback Facility:

Rebate of import duties when the imported good is re-exported or used as input to the production of an exported good.

## E-commerce:

Electronic business transactions, commerce or internet trade. May be conducted between companies (B2B) or between companies and customers (B2C) that are wholly or partially conducted over the internet or similar public or private computer networks.

## e-Fulfillment:

The process of receiving, packaging and shipping orders for goods.

## e-Marketplace:

An online market place. A type of e-commerce site where product or service information is provided by multiple third parties, whereas transactions are processed by the marketplace operator.

## Employed:

Refers to all persons who, at any time during the reference week work at least one hour for pay, profit or family gain (as an employer, employee, own account worker or unpaid family worker).

## Enabling Clause:

Derogates from the MFN principle. It allows members to give better treatment through preferential trading arrangements for trade in goods.

## Digital Marketing:

Marketing of products or services using digital channels to reach consumers. Digital marketing extends beyond internet marketing to include channels that do not require the use of the internet.

## Domestic Support (Subsidies):

- In WTO terminology, subsidies in general are identified by "boxes" which are given the colours of traffic lights: green (permitted), amber (slow down — i.e. to be reduced), red (forbidden).
- In agriculture, domestic support refers to domestic subsidy or other measure which acts to maintain producer's price at levels above those prevailing in international trade. Examples include direct payments to producers, input and marketing cost reductions measures.

## Door-to-Door:

Contract of carriage that includes pre-carriage, main-carriage and on-carriage by the same carrier:

- Door-to- (Air) Port:  
Contract of carriage including pre-carriage and main-carriage to airport or ocean port or truck terminal port or rail port
- (Air) Port-to- (Air) Port:  
Contract of carriage for main carriage only
- (Air) Port-to-Door:  
Contract of carriage including main carriage and on-carriage

## e-Payment:

Online payment transactions on the internet. A subset of an e-commerce transaction to include electronic payment for buying and selling goods or services offered through the Internet.

## Early Harvest:

This term refers to conclusion of selected areas under negotiations before agreement is reached on all areas being negotiated (contrast with single undertaking).

## Equipment Manufacturing Services:

Companies that test, manufacture, distribute, and provide return/repair services for electronic components and assemblies for original equipment manufacturers (OEMs).

# Final Determination of an Anti-Dumping Investigation Concerning Imports of Cold Rolled Coils of Iron or Non Alloy Steel, of Width More than 1300mm Originating or Exported from the People's Republic of China, Japan, Republic of Korea and the Socialist Republic of Viet Nam

The Government of Malaysia has concluded the anti-dumping investigation concerning imports of cold rolled coils of iron or non-alloy steel, of width more than 1300mm (subject merchandise) from the People's Republic of China, Japan, Republic of Korea and the Socialist Republic of Viet Nam and decided to impose final affirmative anti-dumping duties as follows:

## People's Republic of China

Angang Steel Company Limited	4.82%
Maanshan Iron and Steel Co., Ltd.	4.76%
Shougang Jingtang United Iron & Steel Co., Ltd.	8.74%
Others	26.38%

## Japan

All Producers/Exporters	26.39%
-------------------------	--------

## Republic of Korea

POSCO	Nil
Others	3.84%

## Socialist Republic of Viet Nam

POSCO Vietnam Company Limited	7.70%
Others	20.13%

The Government has also made a final determination that the definitive anti-dumping duties will not be imposed on imports of:

- tin mill black plate; and
- subject merchandise for automotive and transformer's finwall end-usage.

The Royal Malaysian Customs Department will enforce the collection of anti-dumping duties and this measure will be effective for five (5) years, from 25 December 2019 to 24 December 2024. The investigation was initiated by the Government of Malaysia in accordance with the Countervailing and Anti-Dumping Duties Act 1993 and Countervailing and Anti-Dumping Duties Regulation 1994 on 29 March 2019 based on a petition filed by Mycron Steel CRC Sdn. Bhd. on behalf of the Domestic Industry producing cold rolled coils. The Petitioner alleged that subject merchandise from the alleged countries are being imported into Malaysia at a price lower than the selling price in their respective domestic markets, causing material injury to the Domestic Industry in Malaysia.

With the imposition of anti-dumping duties on imports of subject merchandise from the alleged countries, it is expected that the issue of unfair trade practices will be addressed. Interested parties, such as local producers, importers, foreign producers/exporters and associations related to the investigation can have access to the non-confidential version of the public report on the Final Determination by submitting a written request to:
