## EXPLANATORY NOTES

1. Credit and debit entries for goods and services in the balance of payments accounts are equivalent to flows of exports and imports of goods and services.
2. Transportation covers all transportation services that are performed by residents of one economy for those of another and that involve the carriage of passengers, the movement of goods (freight), rentals (charters) of carriers with crew, and related supporting and auxiliary services.
3. Travel covers primarily the goods and services acquired from an economy by travellers during visits of less than one year in that economy. The goods and services are purchased by, or on behalf of, the traveller or provided, without a quid pro quo (that is, are provided as gift), for the traveller to use or give away. Travel includes expenditure on goods, accommodation and food and beverage serving services and also all other travel expenditure. Excluded is the international carriage of travellers, which is covered under transportation.
4. Debt service ratio is the amount of principal repayments (excluding repayments) and interest payments on external loans expressed as a percentage of the total exports of goods and services.
